

## The All-In-One Control Solution New TouchLink Pro Touchpanels with Built-in Control Processor

### TLC Pro 526M, TLC Pro 726M, and TLC Pro 1026M

We are pleased to introduce TouchLink Pro Control Systems. These are complete AV control solutions that combine a TouchLink Pro touchpanel with an integrated IP Link Pro control processor. This all-in-one approach streamlines system designs by consolidating essential control system components, freeing up space, and easing integration. The included port expansion adapter makes it easy to add traditional control ports when needed, directly at the touchpanel. All TLC Pro control systems maintain the same stylish appearance and high performance of our TouchLink Pro touchpanels and are ideal for any environment requiring a customizable, all-in-one touchpanel control system.

#### Features

- 5", 7", and 10" high-res capacitive touchscreens and 24-bit color depth
- Provides control of multiple devices directly from the Ethernet port
- Port expansion adapter provides convenient control directly from the touchpanels:
  - Two bidirectional RS-232 ports
  - One contact closure port
  - One IR port
  - Two relays
- All-in-one design saves space in equipment racks and streamlines integration
- Tough Gorilla Glass® screen is scratch and smudge-resistant
